

exception

```
classDiagram
    class exception {
    }
    class ComSquare_NotImplementedException {
        + NotImplementedException()
        + what()
    }
    ComSquare_NotImplementedException --|> exception
```

The diagram illustrates a class hierarchy. At the top is a class box labeled 'exception'. It has three horizontal compartments: the top one contains the text 'exception', and the other two are empty. Below this box is a red hollow triangle pointing upwards, indicating inheritance. The base class is 'ComSquare::NotImplementedException', shown in a grey-shaded box with three compartments. The top compartment contains the class name, the middle one is empty, and the bottom one lists two methods: '+ NotImplementedException()' and '+ what()'.

ComSquare::NotImplemented  
Exception

+ NotImplementedException()  
+ what()
