

exception

```
classDiagram
    class exception {
    }
    class ComSquare_NotImplementedException {
        + NotImplementedException()
        + what()
    }
    ComSquare_NotImplementedException --|> exception
```

The diagram illustrates a class hierarchy. At the top is a class box labeled 'exception' with three empty compartments. Below it is a class box for 'ComSquare::NotImplementedException' with three compartments: the top for the class name, the middle for attributes (empty), and the bottom for methods. A red arrow points from the bottom of the 'ComSquare::NotImplementedException' box to the bottom of the 'exception' box, indicating inheritance.

ComSquare::NotImplemented
Exception

+ NotImplementedException()
+ what()
